

# Seasonal Planting Calendar (Australia)

A simple what-to-sow guide for temperate Australia. Tick a season and get planting with the kids.

Season	Sow & plant
<b>Summer</b> Dec–Feb	Beans, cucumber, zucchini, corn, basil, lettuce (shade), tomatoes (early)
<b>Autumn</b> Mar–May	Peas, broad beans, spinach, kale, broccoli, cauliflower, garlic, carrots, beetroot
<b>Winter</b> Jun–Aug	Broad beans, peas, onions, leeks, Asian greens, lettuce, spinach (mild areas)
<b>Spring</b> Sep–Nov	Tomatoes, capsicum, beans, pumpkin, zucchini, herbs, lettuce, radish, sunflowers

A general temperate-zone guide — tropical, arid and cool/alpine areas differ. Check your local climate zone and the back of the seed packet.

**Loved this?** It's a taste of **The Nature-Led Year** — 40 weeks of nature-led homeschooling that follows the Australian seasons. Find it at [kidsbynature.com.au/planner](https://kidsbynature.com.au/planner).
